

## PROSTATE MRI PREP SHEET

- Patients over the age of 60 must have recent lab work (BUN and Creatinine) within 30 days. Please have this available at least 2 days prior to exam.
- Please take a laxative at 5:00 pm the night before exam.
- An enema is required 1-2 hours prior to exam time.
- Also do not eat or drink anything 8 hours before your exam.
- Please arrive 15 minutes prior to appointment with your doctor's order, insurance cards, and picture id.
- Bring any biomedical device cards with you to this appointment.
